

Name: _____ Level: _____

WATER FORMS

Let's learn about the forms of the water. Then label the pictures with solid, liquid and gas.

SOLID

LIQUID

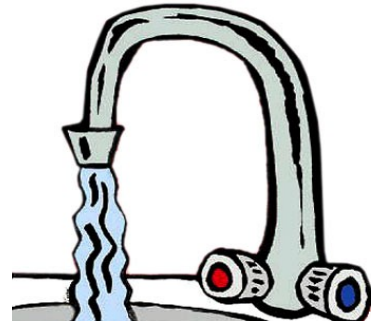

GAS

We can find water in three different forms: liquid, solid and gas. Water is a liquid, ice is a solid and water vapour is a gas.

Name: _____ Level: _____

1. Write the forms of the water.

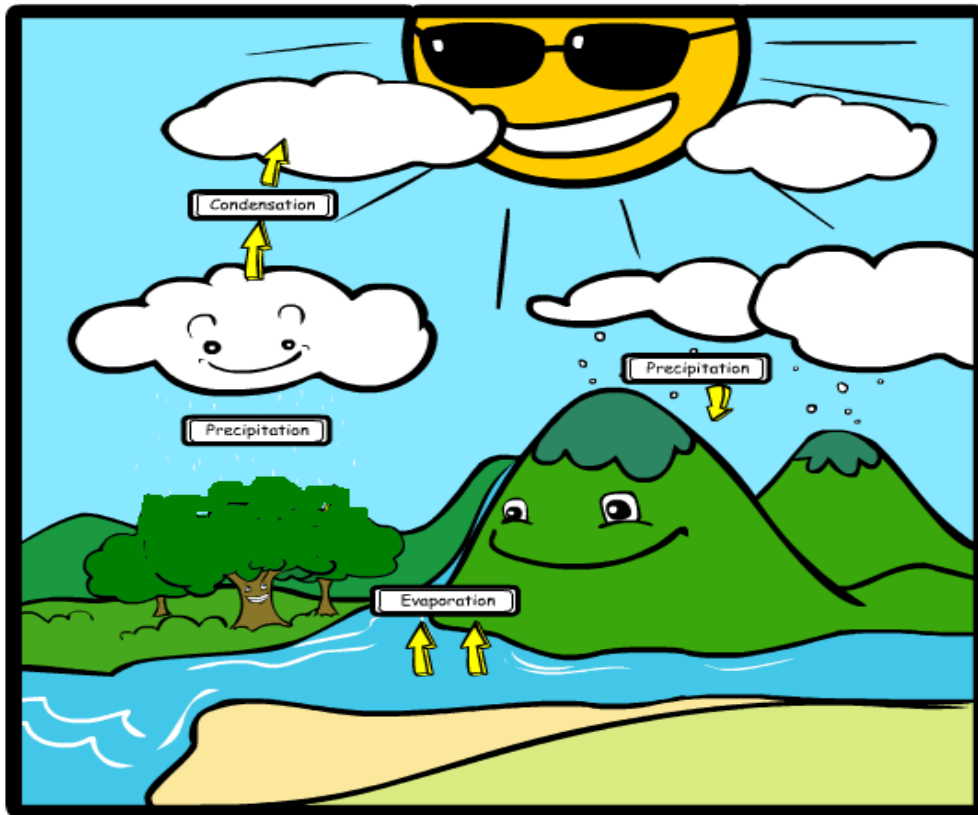

2. Find the three forms of the water in the wordsearch. Then write them.

A	T	S	G	O	H	F	L	D	W	Q	X	C	F	A

WATER CYCLE

When it is hot the water from the sea evaporates. (EVAPORATION). The water vapour condenses (CONDENSATION) into tiny drops and forms clouds. When the clouds are cold it rains or snows. The rain or snow falls into the sea. This is the water cycle.

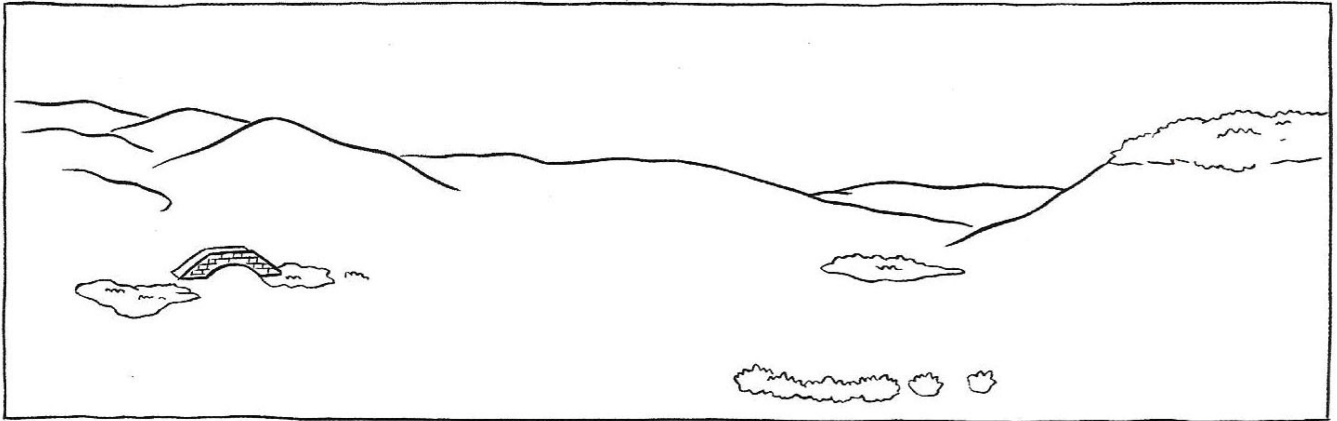

3. Translate the following words:

- Condensation : _____
- Evaporation : _____
- Precipitation : _____
- Drops : _____
- Clouds: _____

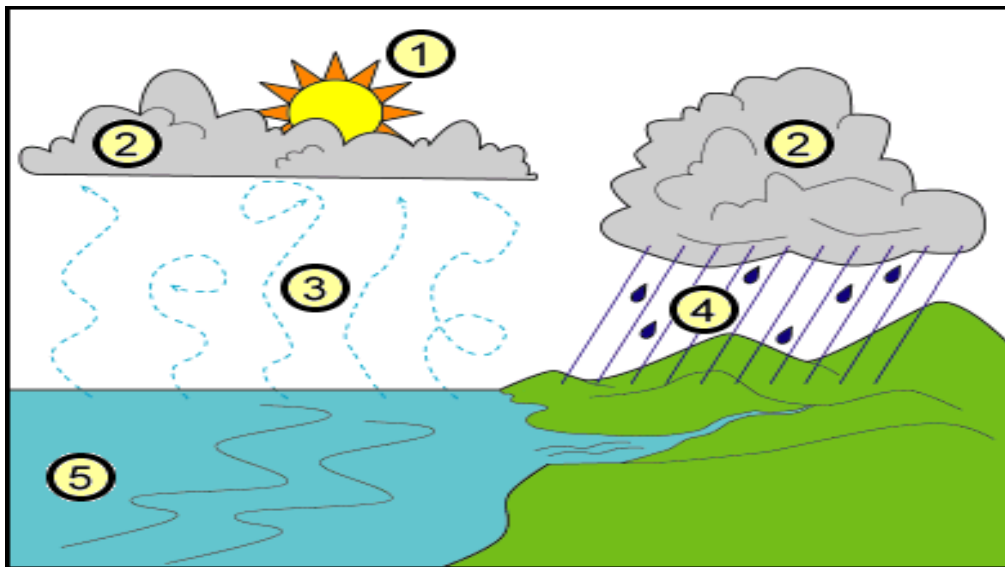

Name: _____ Level: _____

4. Draw the following elements in the landscape

- | | | | | |
|-----|-------|--------|------|------|
| SUN | RIVER | CLOUDS | SNOW | RAIN |
|-----|-------|--------|------|------|

5. Look at the picture and write its names.

1. _____

4. _____

2. _____

5. _____

3. _____
